

Proposed Corrigendum No. 1 to A/54A, “Guide to the Use of the ATSC Digital Television Standard”

1. RATIONALE FOR CHANGE

ATSC Recommended Practice A/54A, “Guide to the Use of the ATSC Digital Television Standard,” was published on 4 December 2003. It recently came to the attention of ATSC staff that the trace of Figure 8.1, “Segment error probability, 8-VSB with 4 state trellis decoding, RS (207,187),” is not correctly positioned relative to the horizontal axis. The replacement figure contained in this document corrects this error.

2. CHANGE INSTRUCTIONS

Replace Figure 8.1 of A/54A with the following illustration and outline.

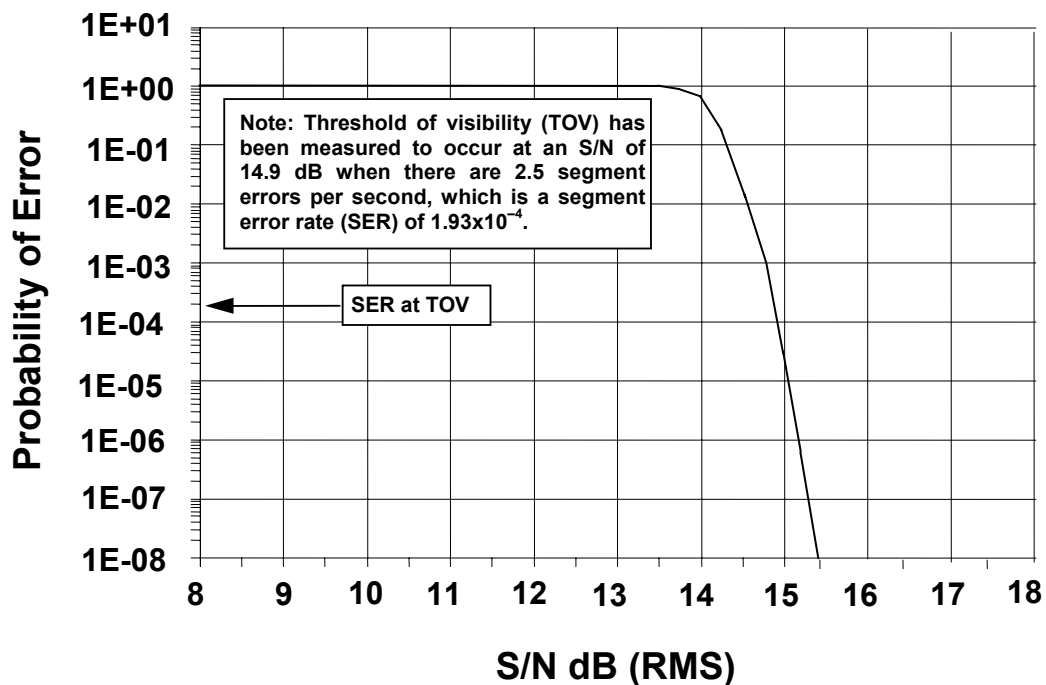

Figure 8.1 Segment error probability, 8-VSB with 4 state trellis decoding, RS (207,187). The plotted values shown are approximate.
